The Tennessee started to Evansville to-night in place of the Cumberland, and takes 1,000 sacks of corn for reshipunent east per rail. The Mary Allee returned from Memphis and laid up here. The Dick Fulton came here this morning and returned to Little Chain with burges to lighten two others still aground there. One barge is sunk in 10 feet water and abandoned until the river falls. The river fell 3 inches to-day. Light rain since 4 p. M. Heavy fog prevents navigation. Mercury 40 degrees. Our boatmen feel certain of a speedy resumption of navigation to St. Louis. The Submarine No. 11 was taken into the Cairo dry docks to-day.

St. Louis, Dec. 28, 7 p. M.—Mild, and river business light. No steamers left here to-day or arrived. Two boats are represent to leave to-morney for New.

Even the New York Tribune, the great High Priest of Radicalism, in speaking of recent developments of Pederal official corruption in New Orleans, laments over the rottenness of pennank in the following strains:

"Appalling corruption in all branches of the new coins are to be one than in the control of the interest of the new coins are to be one three and five cents, and they are to be one-fourth nickle and the stock, and the Green and the sore-keepers." Of Gen. Grant, by the same authority, we are also told: "If he strikes at the whisky ring he will find Senators and insubers of Congress, who have had the revenue offices with its agents and list tools, throwing every possible obstanced in his way. And if his assaults become too formidable he will find the party rings coming to the rescue, and shielding interests, which, they will assure him, are too powerful to be neglected or despised."

There seems little hope that whatever from Grant's efforts may be to "cleanse the Augean statless" that he will be able to get his official spade below the niere crust, while the great mass of corruption will lie too deep and solid to be stirred. The remedy is in a thorough sweeping out of Jacobin republicanism and the restoration to power of the Coustitutional Democracy, which will surely take place when Grant has said his little piece and given place to the nominee of the next Democratic convention.

The reports for November and December show the city to be in a better sanitary condition than ever before; and now that the people have learned to appreciate the efficacy of sanitary measures when properly applied, it will be a comparatively easy matter to keep the city in this condition.

During the past year we have been compelled to order but one warrant.

At your last meeting I reported that several cases of small-pox had made their appearance; since then, but one new case has been reported.

I have supplied the dispensaries of the city with vaccine matter, and had uotice given to the colored population (annong whom this disease is confined) that they would be vaccinated at any of the dispensaried at any of the dispensaries of the vaccinated at any of the dispensaries and the properly applied to a comparatively easy matter to keep the city in this condition.

You will see by these reports that the work done has not been a small one, and you will be satisfied that the sanitary in spectors have taithfully discharged their duties.

I append the mortary reports for the years 1866 and 1808. You will see by a comparison that the mortality has been decreased nearly 700 deaths per animin. When we consider that in the month of Inly, 1808, the mortality throughout the leugth and breadth of the land, was greater than for the same period at any time since 1856, (except during yellow tever and cholera epidemics), and further consider, that within the last two years our city has spread out over a vast territory, and that the population basineressed from ten to twenty thousand, it is ustonishing to limit the mortality less than then.

The Board of Health was first established in February, 1856, no record of deaths being kept prior to this time.
